**REMARKS**

Currently pending in this application are claims 44-69, 71-79 and 81-96. Claims 1-24 were cancelled in a prior amendment and claims 70, 80 and 97 have been cancelled in this amendment.

Claim 51 has been amended to refer to a solvent instead of a diluent and to depend from claim 44.

Claim 53 has been amended to delete reference to castor oil.

Claim 57 has been amended to refer to a solvent instead of a diluent and to depend from claim 53.

Claim 68 has been amended to refer to a solvent instead of a diluent and to depend from claim 62.

Claim 71 has been amended to change addition to additive, correcting an obvious typographical error.

Claim 78 has been amended to refer to a solvent instead of a diluent and to depend from claim 71.

Claim 81 has been amended to change addition to additive, correcting an obvious typographical error and to delete reference to castor oil.

Claim 85 has been amended to refer to a solvent instead of a diluent and to depend from claim 81.

Claim 89 has been amended to change addition to additive, correcting an obvious typographical error.

Claim 95 has been amended to refer to a solvent instead of a diluent.

The examiner has rejected claims 51, 68, 78, 85 and 95 under 35 U.S.C. §112, first paragraph as failing to comply with the written description requirement. Specifically the

examiner noted that the specification did not support defining certain compounds recited in the claims as “diluent” when the specification defined them as solvents. The claims have been amended to define the compounds as solvents and to change their dependency to the preceding independent claim.

The examiner next rejected claims 47, 64, 70, 71, 74, 75, 80, 81, 89, 91, 92 and 97 under 35 U.S.C. §112 as indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention.

The examiner rejected claims 47, 68, 74 and 91 on the grounds that the examiner did not see the distinction between the plant oil extracts derived from grain and the vegetable and nut plant oils. The examiner stated the opinion that vegetables and nuts are also grains. Applicants respectfully traverse this rejection. As defined by Webster’s, a grain is a seed of fruit from a cereal or grass. Merriam-Webster’s Collegiate Dictionary, p. 543 (11<sup>th</sup> Ed. 2003) (attached). A vegetable on the other hand is a herbaceous plant and a nut is a hard shell dry fruit or seed. Id at 853, 1386. While all of these are plants, they are different varieties and the differences in the oil extracts and oils would be apparent to one skilled in the art. In addition, plant oil extracts are generally obtained from chlorophyll containing parts of the plant (see, e.g. paragraphs 59 and 60), whereas vegetable oils are generally extracted from the seed, nut or fruit (see, e.g., paragraphs 75 and 76). Thus, applicant respectfully submits that the two groups of materials are distinct the claims are not indefinite.

The examiner rejected claims 65 and 70 as substantial duplicates. Claim 70 has been cancelled rendering the rejection moot.

The examiner rejected claims 71, 81 and 89 noting that the term “addition” should read “additive.” The claims have been amended to change the term “addition” to “additive”.

The examiner rejected claims 75 and 80 as substantial duplicates. Claim 80 has been cancelled rendering the rejection moot.

The examiner rejected claims 92 and 97 as substantial duplicates. Claim 97 has been cancelled rendering the rejection moot.

The examiner has rejected claims 53, 56-59, 81 and 84-87 under 35 U.S.C. §102(b) as anticipated by U.S. Patent 5,862,369 to Jordan. The examiner noted that Jordan teaches a fuel composition that contains beta-carotene (carotenoid), chlorophyll (hydrophobic plant extract) and ethoxylated castor oil (thermal stabilizer) as well as cetane improvers. The composition may be diluted with various solvents including gasoline, toluene, diesel fuel and alcohols. Applicants respectfully submit that the claims as amended are not anticipated by Jordan.

As noted above, the Markush group in claims 53 and 81 that define the thermal stabilizer does not include castor oil. None of the other oils recited in the claims are taught or recited in Jordan. Thus Jordan can not anticipate the claims. Claims 56-59 depend from claim 53 and claims 84-87 depend from claim 81. Since Jordan does not anticipate the independent claims it can not anticipate the dependent claims..

**CONCLUSIONS**

Applicant submits that the pending claims are free of the art and are in condition for allowance.

Applicant believes there is no fee due with this response. However, if fees are due, please charge our Deposit Account No. 06-2375, under Order No. P02956US0 (AKA ORYXE.029A) from which the undersigned is authorized to draw.

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This Office action is in response to the amendment filed February 26, 2004 in which claims 1-43 were canceled and claims 44-97 were added. The Double Patenting rejection is withdrawn in view of the Terminal Disclaimer.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 51, 68, 78, 85 and 95 and their dependents are rejected under 35

U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in

such a way as to reasonably convey to one skilled in the relevant art that the

inventor(s), at the time the application was filed, had possession of the claimed

invention. The original filed specification and claims, claim 10 for instance, do not

support benzene, o-xylene, m-xylene, p-xylene, cyclohexane, hexane, octanes, nonane,

2-cycle oil, gasoline and resid fuel as a diluent for the additive composition. The

specification teaches that these compounds are used as solvents.

3. Claims 47, 64, 65, 70, 71, 74, 75, 80, 81, 89, 91, 92, 97 and their dependents are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to

Art Unit: 1714

particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 47, 64, 74 and 91 are rejected because it is not clear how the vegetable oil and nut oil thermal stabilizers differ from the plant oil extract derived from grain.

Vegetables and nuts are also grains.

Claims 65 and 70 are substantial duplicates.

In claims 71, 81 and 89, "addition" should read – additive --.

Claims 75 and 80 are substantial duplicates.

Claims 92 and 97 are substantial duplicates.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 53, 56-59, 81 and 84-87 are rejected under 35 U.S.C. 102(b) as being anticipated by Jordan (US 5,826,369).

Jordan teaches a carbonaceous fuel composition comprising a fuel additive of beta-carotene (carotenoid), chlorophyll (hydrophobic plant extract), ethoxylated castor oil (thermal stabilizer) and cetane improvers (see abstract; col. 2, lines 11-22). The carbonaceous fuel may be any carbonaceous fuel including gasoline, diesel fuel, heavy fuel oil (resid), etc. (see col. 2, lines 23-43). The fuel additive may be diluted with a

Art Unit: 1714

solvent such as gasoline, toluene, diesel fuel and alcohols (see col. 2, line 60 through col. 3, lines 1-6). Jordan teaches that the ethoxylated castor oil provides enhanced combustion characteristics and reductions in pollutant emissions.

Accordingly, Jordan teaching all the limitations of the claims anticipates the claims.

6. Claims 44-46, 48-50, 52, 62-63, 66, 67 and 69 are allowed. The prior art fails to teach or suggest the combination additive of a plant oil extract derived from grain, a carotenoid, and a thermal stabilizer.

7. Claims 54-55, 60-61, 72-73, 76-77, 79, 82-83, 88, 90, 93-94 and 96 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fails to teach or suggest that the plant oil is derived from a member of the Leguminosae family or grain.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
